

# Water Harvest

"PUT YOUR RAIN TO WORK"

City of Flagstaff  
Rain Barrel Distribution  
July 24, 2004

Each year, more and more Flagstaff residents take advantage of wonderful new water conservation techniques. By harvesting rainwater you are able to cut water costs, reduce storm water impacts, protect watersheds, recycle industrial food grade barrels, keep water away from your home's foundation, and grow a great looking yard and garden to boot - all using the rainwater that falls on your roof...

Did you know; 1 inch of rain will provide over 600 gallons of water for every 1000 ft<sup>2</sup> of roof? For the second year, the City of Flagstaff has a limited number of rain barrels available. This year's rain barrels have a capacity of 55 gallons. They are grey, with a brass spigot and screw top lid. Barrels are \$25.00 each with a maximum of 2 per household...

You may pre-purchase a barrel with the order form below. Purchased barrels will be distributed on **Saturday, July 24 between 9AM and 2PM at the Public Works Yard located at 419 N. Mogollon in the downtown area.** Remaining barrels will be sold on a *first come, first serve basis*.

This order form is for **City residents only**, for additional information call 779-7646. County residents can call 526-2735 for rain barrel information...
